LinkedIn | GitHub | Credly

Summary

B.Tech student in Artificial Intelligence & Robotics with project experience in business data processing, entity resolution, geospatial analytics, and AI-enabled workflow prototyping. Experienced in transforming raw listings into structured datasets and applying segmentation, scoring, and market-sizing techniques to support business analysis. Seeking Fintech AI, Business AI, Risk Analytics, or Financial Technology internships.

Technical Skills

Programming: Python, SQL, JavaScript, TypeScript, C++
Business & Data Analytics: Pandas, NumPy, Data Cleaning, Exploratory Data Analysis, Data Validation, Entity Resolution
Business Analysis: Provider Segmentation, ICP Scoring, Market Sizing (TAM/SAM/SOM), Probability Analysis, Price-Elasticity Analysis
Automation & AI: n8n, LangChain, LangGraph, CrewAI, LLM/RAG Concepts, AI-Assisted Workflow Design
Data Collection: BeautifulSoup, Selenium, Playwright, Web Scraping, Address Normalization, Fuzzy Matching
Visualization & Tools: Leaflet.js, Chart.js, Jupyter, Git, AWS Fundamentals

Experience

YAVORA 2026 – Present
CTO / Founding Technical Lead *Early-stage B2B SaaS*

- Translated real-estate SaaS requirements into technical specifications and prototype milestones for lead management and AI-assisted WhatsApp/voice workflows.
- Documented proof-of-concept scope, workflow requirements, and implementation status to distinguish planned capabilities from completed prototype functionality.

Urban Garages / WashLink 2026 – Present
CTO / Founding Technical Lead *Vehicle-care marketplace prototype*

- Developed a Python data-cleaning and deduplication workflow for 80+ local automotive-service listings to support geospatial analysis and a dashboard.
- Built a React Native/Expo marketplace prototype with customer and operator portals and mock-backed booking workflows.

Selected Projects

CDIOS – Healthcare Data Intelligence System *Business Analytics | Python | Geospatial Data*
Data Quality, Segmentation, Market Analysis

- Consolidated 3,927 raw listings into 3,694 records using validation and entity resolution; the separately defined project data-trust score was 94%.
- Applied provider segmentation, ICP scoring, probability and price-elasticity analysis, and TAM/SAM/SOM estimation to structure business and market insights.
- Built a geospatial dashboard covering 34 zones and 1,321 localities using Leaflet.js and Chart.js.

YAVORA – AI-Assisted Business Workflow Prototypes *Business Process Analysis | AI Workflow Design*
Lead Management and Communication Workflows

- Translated business requirements into technical specifications and prototype milestones for AI-assisted lead management and WhatsApp/voice workflows.
- Documented proof-of-concept scope and implementation status; workflows should not be interpreted as production-deployed systems.

WashLink – Vehicle-Care Booking Marketplace *Product Analytics Context | React Native | TypeScript*
Marketplace Prototype

- Implemented customer and operator flows, vehicle profiles, booking status timelines, slot-hold interfaces, GST/promo calculations, and operator capacity/staff views.
- Used mock services for booking and payment-related flows; no live financial transactions are claimed.

RetinaGuard – Explainable Screening Prototype *Model Evaluation | Python | ONNX Runtime*
Quantitative Evaluation and Validation

- Evaluated a ResNet-18 ONNX model on a 701-image held-out APTOS split, achieving 87.68% sensitivity, 90.41%

specificity, 89.30% accuracy, and 0.9623 AUROC.
- Verified Python/Node.js prediction agreement on 699 of 701 images (99.7%). Research prototype; not clinically validated or regulator-cleared.

Education

Gyan Ganga Institute of Technology Sciences 2023 – 2027
B.Tech in Artificial Intelligence & Robotics

Certifications

AWS: Machine Learning Foundations, Generative AI Foundations, Cloud Foundations, NLP
Cisco: Python Essentials 1 & 2, Data Analytics
Oracle: Database Foundations
CampusX: n8n, CrewAI
