Yash Singh Thakur

Applied AI/ML | Computer Vision | Data Engineering
yashsinghthakur69@gmail.com | +91 9098216189 | LinkedIn | GitHub | Credly

Professional Summary

B.Tech student in Artificial Intelligence & Robotics and founding technical lead with project experience in computer-vision evaluation and inference, explainability, data validation, entity resolution, geospatial analytics, and mobile application prototypes. Seeking Applied AI/ML, Computer Vision, or Data Engineering internships.

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL, C++
ML & AI: ML/DL, model evaluation, ONNX Runtime, class activation maps (CAM), embeddings, RAG concepts
Data Engineering: Pandas, NumPy, web scraping, data validation, entity resolution, Jaro–Winkler, FuzzyWuzzy, address normalization
Frameworks & Tools: Node.js, React, React Native, Expo, Vite, Tailwind CSS, LangChain, LangGraph, CrewAI, Playwright, Selenium, BeautifulSoup, Leaflet.js, Chart.js, n8n, Git, Jupyter, AWS fundamentals

Experience

YAVORA *2026 – Present*
CTO / Founding Technical Lead | Early-stage B2B SaaS and AI-enabled workflows
- Translated real-estate SaaS requirements into technical specifications and prototype milestones for AI-assisted lead management and WhatsApp/voice workflows.
- Documented proof-of-concept scope and implementation status to distinguish planned workflows and prototypes from production-deployed functionality.

Urban Garages / WashLink *2026 – Present*
CTO / Founding Technical Lead | Vehicle-care marketplace prototype
- Built a React Native/Expo marketplace prototype with customer and operator portals, reusable UI components, and mock-backed booking workflows.
- Developed a Python data-cleaning and deduplication workflow for **80+ local automotive-service listings** to support a geospatial dashboard.

Selected Projects

RetinaGuard – Explainable Diabetic Retinopathy Screening Prototype *Computer Vision | ONNX*
GitHub | Live Demo
- Evaluated a ResNet-18 ONNX model for referable DR (grade ≥ 2) on a 701-image held-out APTOS split: **87.68% sensitivity**, **90.41% specificity**, **89.30% accuracy**, and **0.9623 AUROC**.
- Verified Python/Node.js prediction agreement on **699/701 images (99.7%)** and integrated class activation map (CAM) visualizations for interpretability. Research prototype; not clinically validated or regulator-cleared.

CDIOS – Healthcare Data Intelligence System *Data Engineering | Geospatial Analytics*
GitHub | Live Dashboard
- Consolidated **3,927 raw listings into 3,694 records** through validation and entity resolution; the separate **94% data-trust score** is project-defined and is not a deduplication or accuracy rate.
- Applied Jaro–Winkler matching, geographic clustering, provider segmentation, ICP scoring, probability and price-elasticity analysis, and TAM/SAM/SOM estimation; dashboard spans **34 zones** and **1,321 localities** using Leaflet.js and Chart.js.

WashLink – Vehicle-Care Booking Marketplace *React Native | TypeScript*
Urban Garages project
- Implemented customer/operator flows with a reusable **25-component** UI system, slot-hold interfaces, GST/promo calculations, OTP verification, vehicle profiles, status timelines, and operator capacity/staff views. Booking and payment flows use mock services, not live transactions.

AI-OS – AI Skills, Agents & Workflow Repository *Knowledge Organization*
GitHub
- Curated and organized **68,160+ repository resources across 35 domains**, including skill files, agent definitions, workflow pipelines, and n8n templates; the count describes repository contents, not deployed or operational assets.

Education & Certifications

B.Tech, Artificial Intelligence & Robotics 2023 – 2027
Gyan Ganga Institute of Technology Sciences
AWS: Machine Learning Foundations, Generative AI Foundations, Cloud Foundations, NLP | **Cisco:** Python Essentials 1 & 2, Data Analytics
Oracle: Database Foundations | **CampusX:** n8n, CrewAI
